

MARC RANIELLE RABANILLO

SOFTWARE DEVELOPER | WEB & MOBILE APPLICATION DEVELOPMENT

Caloocan City | rabanillomarc@gmail.com | +639812897198 | GitHub: github.com/marcRanielle

PROFESSIONAL SUMMARY

Entry-level Software Developer and Bachelor of Science in Information Technology graduate with hands-on experience in web and mobile application development, system testing, implementation, and deployment. Skilled in Flutter, Dart, JavaScript, PHP, HTML, CSS, Firebase, and MySQL, with experience developing academic applications and performing software testing, debugging, system configuration, and post-deployment verification.

TECHNICAL SKILLS

- **Programming:** Dart, JavaScript, PHP, HTML, CSS
- **Mobile Development:** Flutter, Android Studio
- **Web Development:** JavaScript, PHP, React, Tailwind CSS, Bootstrap
- **Backend & Databases:** Firebase, MySQL, MongoDB
- **Development Tools:** VS Code, Android Studio, Git, GitHub, XAMPP
- **Software Testing:** Functional Testing, System Testing, Bug Identification, Debugging, Retesting
- **Other:** System Implementation, Deployment, Technical Documentation

PROJECTS

AgriConnect - Mobile App

Capstone Project | Flutter, Dart, Firebase, Android Studio

- Developed a mobile application connecting farmers and businesses for agricultural product requests and transactions.
- Implemented user registration, product requests, messaging, notifications, ratings, and transaction history.
- Integrated Firebase for authentication and application data management.
- Developed and tested application workflows for farmer and business users.
- Conducted functional testing and debugging to identify and resolve application issues.

VRoom — Car Rental Booking System

Academic Web Project | HTML, CSS, JavaScript, PHP, MySQL

- Developed a web-based car rental booking system as an academic project.
- Implemented frontend interfaces and booking-related functionality using HTML, CSS, JavaScript, and PHP.
- Developed server-side functionality and database integration using PHP and MySQL.
- Tested system functions and resolved issues identified during development.

EXPERIENCE

Technical Support Intern

February 2026 - May 2026

Vertex Technologies Corporation

- Implemented and deployed software systems across company workstations and devices.
- Conducted system and functional testing to identify bugs, errors, and application issues.
- Troubleshoot software and system issues and performed retesting after corrective actions.
- Performed system audits and verified applications, configurations, and deployed devices across departments.
- Configured and deployed applications on tablets and company devices, including SFA, Tailscale, Migle, and VOS.
- Performed post-deployment verification to ensure applications and systems were functioning as expected.
- Documented testing results, system issues, configurations, and IT-related activities.

EDUCATION

Bachelor of Science in Information Technology Major in Web and Mobile Technologies

July 2026

Pangasinan State University - Alaminos City Campus
